

VGP COMBI SKIN

"Skin" effect packaging

Easy to use

Safety guaranteed

Safety in numbers!

The only thermosealing machine on the market with a double function: it seals in modified atmosphere and with Skin effect. This innovation allows to supply the machine with a traditional sealing group, using standard moulds or mould with cut of seal, 3 simple steps are all that is needed to transform the thermo-sealing skin into a standard thermo-sealing machine. VGP Combi Skin has an entirely stainless steel frame, small size, and cutting edge, high quality operating and manufacturing characteristics. It can perfectly package solid, liquid and soft products.

VGP COMBI SKIN is ideal for:

Catering

Gastronomy

Dairies

Food laboratories
